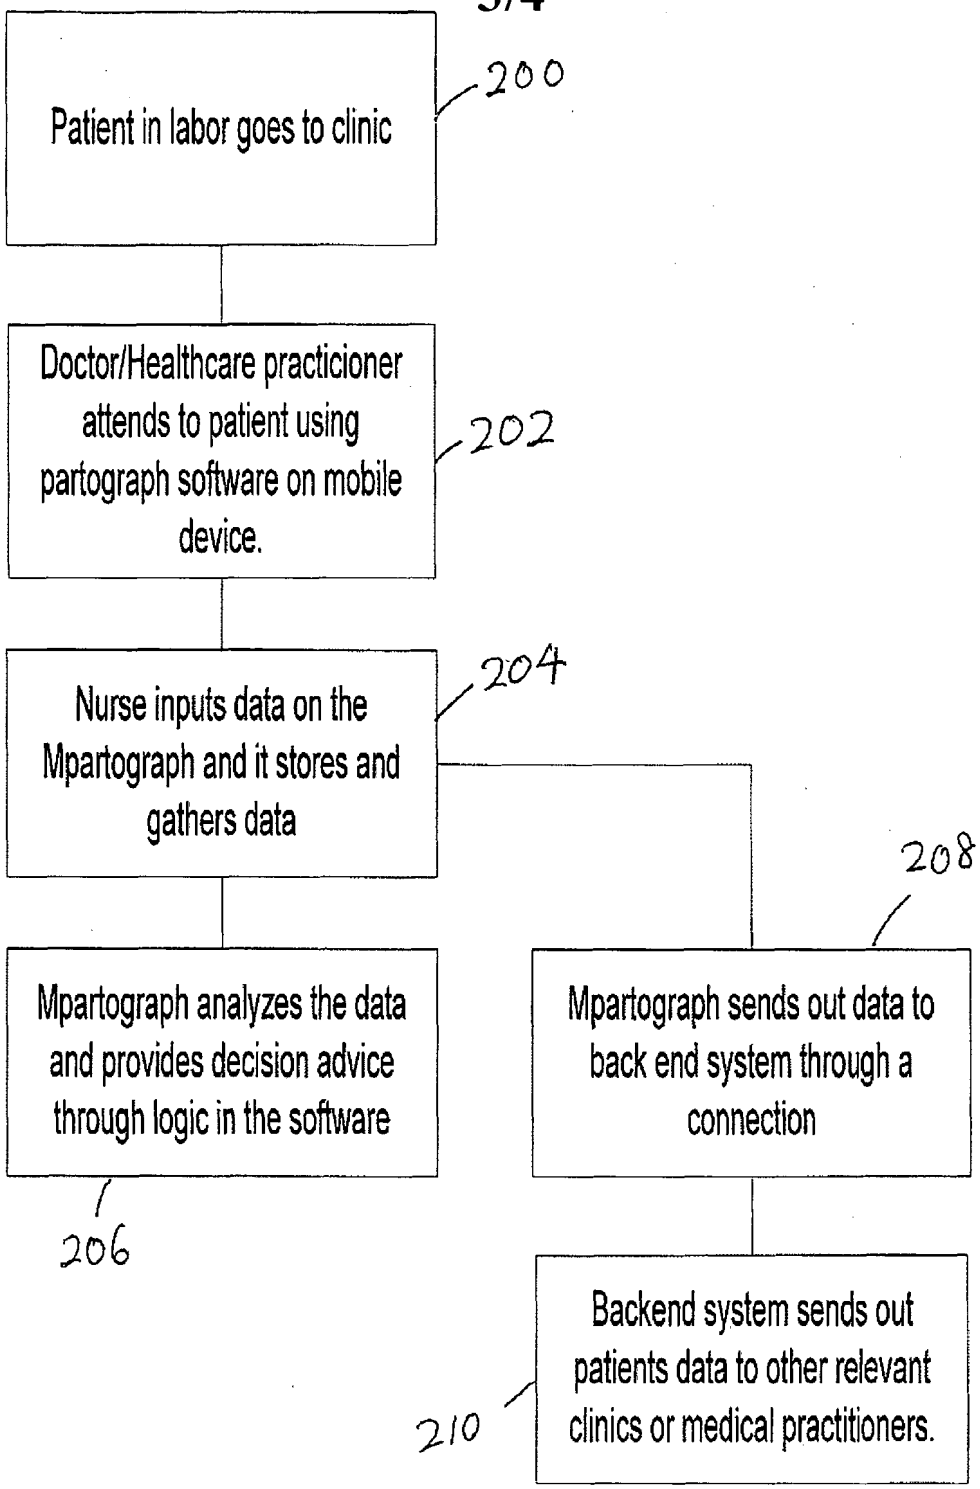
Fig. 2



Patient in labor goes to clinic
200
Doctor/Healthcare practicioner attends to patient using partograph software on mobile device.
202
Nurse inputs data on the Mpartograph and it stores and gathers data
204
Mpartograph analyzes the data and provides decision advice through logic in the software
206
Mpartograph sends out data to back end system through a connection
208
Backend system sends out patients data to other relevant clinics or medical practitioners.

TIME
FINDINGS
Hours in active labour
Hours since ruptured membranes
Rapid assessment
Vaginal bleeding (0 + ++)
Amniotic fluid (meconium stained)
Contractions in 10 minutes
Fetal heart rate (beats/minute)
Urine voided
T (axillary)
Pulse (beats/minute)
Blood pressure (systolic/diastolic)
Cervical dilatation (cm)
Delivery of placenta (time)
Oxytocin (time/given)
