

ABSTRACT OF THE DISCLOSURE

METHOD FOR AROMATIZATION WITH COFFEE AROMA, ARTICLES USED FOR
SUCH AROMATIZATION AND APPARATUS USED IN PREPARING SUCH ARTICLES

Described is a process for aromatizing a specific volume with a stable coffee aroma by (1) effecting pressurization of coffee grinder gas in a pressure vessel free of molecular oxygen and fitted with spraying means and (2) engaging the spraying means in order to spray the stable coffee grinder gas into the specific volume. Also described is apparatus for effecting such aromatization, including a hollow pressurized container free of molecular oxygen and containing stable coffee grinder gas, as well as the hollow pressurized container free of molecular oxygen containing stable coffee grinder gas itself.
