

ABSTRACT

The present invention relates to a portable carrier. The portable carrier comprises a base, a carrier main body and a reinforcing member. The carrier main body is disposed on the base and has a front side part and a rear side part which are located on two opposite sides in a longitudinal direction. The carrier main body and the base jointly form a bearing space. The reinforcing member is disposed on the front side part and/or the rear side part and is connected to the base.
