(54) Title: USING PERMISSIONS TO ALLOCATE DEVICE RESOURCES TO AN APPLICATION

(57) Abstract: Resources to a device (520) are granted access to an application (505) based on privileges associated with the application (505). A permission list (510, 515) is created by a server (500), which indicates what resource (545) the application (505) may access. During application execution when the application (505) requests a resource (545), a control program (540) executing on the device (520) is used to check the permission list (510) associated with the application (505) to determine if the application (505) may access the resource (545).
