(54) Title: METHOD AND ARRANGEMENT FOR MOVING A HEAVY LOAD

Fig. 2

(57) Abstract: Method for moving a heavy load (L), in which method the heavy load (L) is lifted or lowered with an elevator, which elevator comprises an elevator car (1) and a hoisting machine (2), which hoisting machine (2) is arranged to move the elevator car (1) from one level to another in the normal operation of the elevator, in which method the heavy load (L) is moved to be supported by the elevator car and the elevator car is moved until the load (L) is at the desired height, and the load (L) is removed from the support of the elevator car. In the method a hoist (3) that does not belong to the aforementioned hoisting machine (2) is temporarily connected to the elevator car (1) for, the purpose of moving the load (L), and the elevator car, which supports the load (L), is moved by means of the aforementioned hoist (3) until the load (L) is at the desired height, and the load (L) is removed from the support of the elevator car.
