(54) Title: SYSTEM AND METHOD FOR IDENTIFYING THE RAW MATERIALS CONSUMED IN THE MANUFACTURE OF A CHEMICAL PRODUCT

(57) Abstract: A system and method are disclosed that allow a user to identify, within a certain level of confidence, the raw material (1) consumed in the manufacture of a particular chemical product. In addition, the system and method allow a user to identify, within a certain level of confidence, the chemical products, the manufacturing processes of which, consume a raw material. The system compares a raw material or chemical product to a database of companies (4) as well as the chemical products manufactured by companies. Through a statistical analysis, the system reports results (13) to the user that meet a pre-established threshold of accuracy.
