(54) Title: METHOD AND SYSTEM FOR SECRETLY REVEALING ITEMS ON A MULTI-TOUCH INTERFACE

FIG. 3

(57) Abstract: An apparatus and method including a multi-touch interface for card gaming includes providing a multi-touch interface for displaying a card having a hidden value. The method includes detecting a touch on the interface. The touch has a curved pattern with multiple points of contact with the interface. The curved pattern is indicative of the lateral edge of a human hand in contact with the interface, oriented to hide the card from others. The method then detects movement of the multiple points of contact sweeping over a portion of the interface to reveal the value of the card to the user.
