

METHOD FOR PACKING TWO OR MORE ARTICLES OF DIFFERENT SHAPE AND
PACKING MAT

ABSTRACT

[Problem] To hold in a fixed position and pack two or more articles of different shapes made of different materials.

[Solution Means] Two or more articles having different shapes are packed by using a mat 1 filled with a large number of beads 4 evenly over the entire surface. Two or more articles are wrapped in the mat 1, the inside of the mat 1 is deaerated, the large number of beads 4 in the mat 1 gather and are brought into close contact with each other, the mat 1 solidifies along the outer diameter shapes of the articles, and each article is supported at, at least three points by portions of the solidified mat 1 so that the respective articles are held at fixed positions.
