

DISPLAY METHOD AND ELECTRONIC DEVICE

ABSTRACT

5 This application provides a display method and an electronic device. The method may be applied to an electronic device. A first display interface of the electronic device includes an entry indicator for invoking an AI service. The method includes: detecting a first operation on the entry indicator; and in response to the first operation, displaying a second display interface for interacting with the AI service. In the technical solution, a display interface of the electronic device may include the entry indicator for invoking the AI service. A user may perform an operation on
10 the entry indicator to invoke a display interface for interacting with the AI service, so that the user can conveniently use the AI service on the electronic device.
