(54) **Title:** SUPPORT STRUCTURES FOR AUTOMATED CELL ENGINEERING SYSTEMS

(57) **Abstract:** The present technology is generally related to storage structures for cell engineering systems. The storage structures allow for multiple automated cell engineering systems to be held via a single structure, and presented to a user when desired or needed for direct access to the cell engineering system, and then returned to a storage or working position. Many storage structures can be arranged together in a clinical or hospital setting, or other cell therapy engineering manufacturing environment.
