(54) Title: TRANSPORT PIPE

(57) Abstract: The invention relates to a transport pipe (1) of a pneumatic transport system comprising at least one bend (2) whereby at least one impact plate (7) is fixed to the inner circumferential surface of the transport pipe (1), extended into the transport path of the material transported in the pipe, and whereby the plate is provided just before, as seen in the transport direction, at or just after a bend (2) of the transport pipe (1).
