

Biaxial tourbillon for timepieces, particularly wristwatches

5

Abstract

Biaxial tourbillon

10

The tourbillon comprises a first cage (A) containing the balance wheel (10) and the escape pinion (11), with the cage (A) rotating around an axis (A1) that coincides with the axis of the balance wheel, and being housed inside a second cage (B) rotating around an axis (A2) perpendicular to the axis (A1).
