(54) Title: METHOD AND APPARATUS TO COMMUNICATE GRAPHICS OVERLAY INFORMATION

(57) Abstract: A system comprising: a video source module to send a first and second video plane; a graphics source module to send a first and second overlay plane to be blended with first and second video planes, respectively; a media center to connect to said video source module and said graphics source module, said media center to comprise a video processing sub-system to receive said video planes and a graphics processing sub-system to receive said graphics planes, said graphics processing sub-system to send said graphics planes to said video processing sub-system over a single bus, with said video processing sub-system to blend said first video plane with said first overlay plane to form a first blended frame, and said second video plane with said second overlay plane to form a second blended frame; and a plurality of display modules, with a first display module to receive and display said first blended frame, and a second display module to receive and display said second blended frame.
