

Abstract

ARTICLE CARRYING SYSTEM

5 The object of the present invention resides in
provision of a system for carrying an article from a
space having low cleanliness into another space having
high cleanliness.

 A system that carries an article from a space
10 having low cleanliness into another space having high
cleanliness includes a fine particle removal unit that
removes fine particles sticking to an article, a
microorganism removal unit that removes microorganisms
sticking to the article, and a cleanliness measurement
15 unit that measures cleanliness of the article. The
cleanliness in the cleanliness measurement unit is equal
to cleanliness of the space having the high cleanliness.

FIG. 1
