

ABSTRACT

DUAL MODE PERSONAL MOBILITY DEVICE (PMD), A METHOD FOR MANAGING A FLEET OF SUCH PMDS

5

There is provided a dual mode personal mobility device (PMD) which is able to function in a first manned mode and a second unmanned mode. In addition, there is also provided a system and method for managing a fleet of the PMDs, the system and method being
10 configured to optimise deployment of the fleet of the PMDs and to minimise indiscriminate parking of the PMDs.
