(54) Title: JEWELRY RING WITH SECURITY ASPECT (LARGE AND SMALL DISPLAY PORTIONS)

(57) Abstract: A jewelry ring (10) having a main ring (12) with two half-ring segments (14, 18), where each of the ring segments (14, 18) has its own design (16, 20). The design (16) of the first ring segment (14) is more prominent than the design (20) of the second segment (18) and is typically displayed to an outside viewer. However, when, for security or any other reason, the wearer rotates the ring (10), the second half (18) with the less prominent design (20) is displayed, concealing the more prominent design (16) of the first half (14) without alerting a robber that a more prominent design (16) is hidden.
