

ABSTRACT

The present disclosure relates to a multimedia material editing method and apparatus, and an electronic device and a readable storage medium. The method in the present disclosure comprises: displaying information of a first multimedia material in a first track according to the duration of the first multimedia material, and displaying information of a second multimedia material in a second track according to the duration of the second multimedia material, wherein the first multimedia material and the second multimedia material are multimedia materials to be synthesized, and the duration of the first multimedia material is greater than or equal to the duration of the second multimedia material; receiving a trigger operation from a user, wherein the trigger operation is used for triggering automatic selection of the information of the first multimedia material; and displaying in the first track a first selection region for automatically selecting the information of the first multimedia material, wherein the duration of a segment of the first multimedia material corresponding to the range of the first selection region is equal to the duration of the second multimedia material.
