

Protective hood assembly

A b s t r a c t

5 The invention relates to a protective hood assembly, comprising a protective hood (1) which covers the user's head and shoulders and an active air exchange system with a fan (6), a housing (5) for the fan (6) and a filter (8) in the protective hood (1) for used air. The protective hood (1) and the fan (6) are equipped for the arrangement of the fan (6) within the protective hood (1).
