

ABSTRACT

[INVENTION TITLE] LOGISTICS AND PAYMENT AGENCY MANAGEMENT SYSTEM

[PROBLEM] To provide an agency service of billing and payment associated with a product manufacturer and a plurality of parts supplying vendors.

[SOLVING MEANS] A logistics and payment agency management system according to the present invention receives, from a product manufacturer, p/o information issued by the product manufacturer to a parts supplying vendor, manages receiving schedule information about receiving at a logistics warehouse from the parts supplying vendor, and at the time of receiving of component parts at the logistics warehouse, substitutes for the product manufacturer to determine a payment amount (amount of money for inspected parts) for the p/o information to be given by the product manufacturer to each parts supplying vendor, and provides an agency service for billing and payment for the P/O information associated with the product manufacturer and the parts supplying vendor. When partial delivery is performed, the system performs partial inspection for P/O information and manages billing and payment for the P/O information associated with the product manufacture and the parts supplying vendor for each partial inspection.
