(54) Title: A ROTATION ASSEMBLY AND A FURNITURE COMPRISING A ROTATION ASSEMBLY

Figure 2

(57) Abstract: The disclosure describes a rotation assembly (100) for swivelling the seat of a chair to a default position, the rotation assembly (100) comprising a first connection element (200) comprising a spindle (220), and a knob (240), where the knob (240) is arranged on the spindle (220) at a nonzero distance from the central axis (221) of the spindle (220), and a second connection element (300), comprising an engagement element (310), where the second connection element (300) is rotatably engaged with the spindle (220), and where the engagement element (310) is configured to contact the knob (240) and to apply a non-zero force to the knob (240) in a direction at least in part perpendicular to the central axis (221) of the spindle (220).
