

Storage facility for a liquefied gas and/or a hazardous liquid

5

Abstract

Storage facility for a liquefied gas and/or a hazardous liquid

10

The invention relates to a storage installation (1) of a liquefied gas and/or a liquid comprising a coating layer (3) of a tank (71) made of a polymer material or of a mixture of polymer materials, and an intermediate layer (5), disposed between the coating layer (3) and the wall (8, 9, 10) of the tank (71), the intermediate layer (5) allows the circulation of gas in order to press the said intermediate layer (5) against the wall (8, 9, 10) of the tank (71), and/or to allow the detection of liquid or gas coming from the storage space (4) in the event of loss of the seal of the coating layer (3) and/or from the outside of the said storage space (4) in the event of loss of seal of the tank (71).
