(54) Title: **FOUR COLOR MODULAR PRINthead ASSEMBLY**

(57) Abstract: A printhead assembly (10) includes at least one printhead module (12) including a printhead chip (18). A carrier supports the, or each, printhead module (12) in an operative position for printing on print media. Mating formations (92) are carried by the, or each, printhead module (12) and the carrier such that, when the, or each, printhead module (12) is mounted on the carrier, electrical contact is made between electrical contacts of the, or each, printhead module (12) and electrical contacts of the carrier.
