(54) **Title:** CURATED MATCHES AMONG INDIVIDUALS

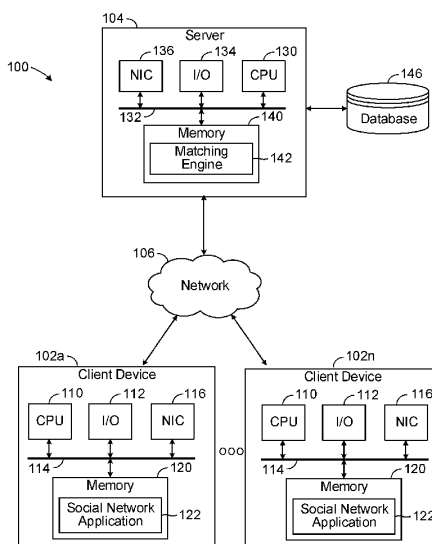

FIG. 1

(57) **Abstract:** Techniques for generating curated matches among individuals include supplying, to a client device, data for display in a graphical user interface, the data including a set of prompts to an individual to specify criteria for identification of one or more other individuals. The criteria is received from the client device and used to identify potential matches between the individual and one or more other individuals from a pool of individuals. A subset of up to a predetermined number of potential matches is selected from the identified potential matches. Profile information for each potential match in the subset of potential matches is supplied to the client device at a scheduled time.
