

COORDINATED COMMUNICATION METHOD, APPARATUS, AND DEVICE, AND STORAGE MEDIUM

ABSTRACT

5 This application provides a coordinated communication method, apparatus, and device, and
a storage medium. The method may be performed by a first device or a component in the first
device. The method includes: The first device sends a first radio frame to a second device, and
receives a second radio frame from the second device, and a transmission agreement is set up
between the first device and the second device, so that the first device and the second device share
a transmission resource under the transmission agreement, to provide a basis for implementing
10 multi-device coordinated transmission.
