

ABSTRACT

An object of the present invention is to provide an affixing apparatus capable of flattening a surface of a film 20 affixed to a main surface 10A of a plate-shaped body 10. An affixing apparatus 30 for affixing the film 20 to the plate-shaped body 10 includes: a plate-shaped mounting member 31 provided with a mounting portion 31A on which the plate-shaped body 10 is mounted; a plate-shaped pressing member 32 installed at a position facing the mounting member 31; and a support member 33 installed at an outer edge of the mounting portion 31A so as to be positioned between the mounting member 31 and the pressing member 32.
