(54) Title: BOTTLE WITH EMULATIVE BODY

(57) Abstract: A bottle (120, 220, 320, 420) includes a base (122) a neck (128), and a body (124) extending axially between the base and the neck, and including at least one radially outwardly facing first surface (134a, 134 b), a radially outwardly facing second surface (146, 346, 446) radially smaller than the first surface, a radially outwardly facing third surface (150, 250, 350, 450) radially larger than the second surface and established collectively by radially outwardly facing projection surfaces (154, 254, 354, 454) of a plurality of projections (152, 252, 352, 452) that project radially outwardly from the third surface. A label (160) may be carried by the body over at least a portion of the third surface. Axial and circumferential space may be established between the label and the second surface.
