(54) Title: ORAL COMPOSITIONS CONTAINING ONDANSETRON

(57) Abstract

The invention relates to a liquid composition for oral administration comprising ondansetron or a pharmaceutically acceptable derivative thereof, a sweetener and one or more pharmaceutically acceptable excipients, characterised in that the sweetener comprises one or more polyhydric alcohols and the pH of the composition lies in the range 2.0 to 5.0. Methods for the manufacture of such compositions and for their use in the treatment of conditions mediated through the action of 5-hydroxytryptamine (5HT) at $5HT_3$ receptors are also described.
