(54) **Title:** WALL MOUNTABLE STORAGE ASSEMBLY WITH ARTICULATING CONNECTION

(57) **Abstract:** A wall mountable storage assembly including a storage device, at least one mounting plate, and at least one double-faced adhesive. The storage device includes a coupling bracket forming a first engagement feature. The mounting plate forms a second engagement feature. The first and second engagement features have a complimentary construction configured to provide a releasable snap fit connection in which the mounting plate can articulate relative to the coupling bracket. The adhesive is configured to be arranged between the mounting plate and a wall, with the mounting plate articulating relative to the coupling bracket to facilitate complete contact between the adhesive and the wall. The storage device can include two spaced-apart coupling brackets. Two of the mounting plates are provided, each carrying adhesive. The mounting plates can articulate independent of one another, accommodating variations in flatness of the wall to which the storage assembly is mounted.
