

ABSTRACT**Gaming Apparatus and Systems**

An embodiment of the present invention provides a bonus scheme associated with a feature event, or part thereof, which provides a plurality of feature games. With reference to the embodiment illustrated in figure 4, a first feature event is conducted at Steps S3 to S5, the outcome of which determines a feature event win value. At Step S7 the feature event win value is compared to a threshold value and, if the gaming process win value is less than, or equal to the threshold value, the player becomes eligible to trigger a second feature event at Step S9.
