

ABSTRACT

Provided is a wiping sheet including a nonwoven fabric and an aqueous cleaning liquid infiltrated into the nonwoven fabric. In the wiping sheet, the aqueous cleaning liquid contains an aromatic antimicrobial agent and a nonionic surfactant. The nonionic
5 surfactant is preferably a polyoxyalkylene alkyl ether. The polyoxyethylene alkyl ether preferably has an ethylene oxide number of 20 or more. The polyoxyethylene alkyl ether having an ethylene oxide number of 20 or more and the polyoxyethylene alkyl ether having an ethylene oxide number of less than 12 are preferably contained.
