DESCRIPTION

TITLE

AIR CONTROL APPARATUS, REFRIGERATION APPARATUS, AND TRANSPORT CONTAINER

TECHNICAL FIELD

[0001]

The present disclosure relates to an air control apparatus, a refrigeration apparatus, and a transport container.

BACKGROUND ART

[0002]

Patent Document 1 discloses an air control apparatus that adjusts the composition of inside air in an internal space. The air control apparatus includes gas separation membranes. Some of the components in target air flowing through the gas separation membranes (such as oxygen and carbon dioxide) permeate through the gas separation membranes. The air whose composition has been adjusted in this manner is supplied into the internal space.
