(54) Title: BALLISTIC IMPELLER GOLF CLUB

(57) Abstract

A ballistic impeller golf club includes a piston (67) and an explosive charge (117) disposed within the head of the golf club. The piston (67) is adapted to travel outwardly from the club head in response to a rapidly expanding gas produced by the explosive charge. A golf ball, disposed proximate to the club, is struck by the piston, thereby causing the golf ball to travel a predetermined distance.
