

ABSTRACT

TERMINAL DEVICE, BASE STATION DEVICE, COMMUNICATION METHOD,
AND INTEGRATED CIRCUIT

5 A terminal device configured to report CSI using multiple uplink cells. In a case
that a total of the number of one or multiple first channel state information reports and
multiple second channel state information reports in a first subframe exceeds a first
certain number, a second certain number of channel state information reports of the one
or multiple first channel state information reports and the multiple second channel state
10 information reports are not updated. The second certain number is a number obtained by
subtracting the first certain number from the total of the number of the one or multiple
first channel state information reports and the number of the multiple second channel
state information reports.
