

A FPC LAMINATING WORKING TABLE

ABSTRACT

The utility model provides an FPC laminating working table, which relates to the technical field of FPC processing equipment, which including a suction platform, a heating table is arranged under the suction platform. A heat pipe, a heat insulating column and a hollow insulation block are arranged under the heat insulation structure, a rotating connecting plate is arranged under the heat insulating structure, the rotating connecting plate is arranged in the heat insulating structure, And the hollow electric slip ring is arranged in the middle hole of the direct drive motor, the slip ring is arranged above the slip ring, and the slip ring is arranged below the slip ring, and the slip ring is arranged directly under the rotary connecting plate. A fixed block and a slip ring fixing block, and a moving table is arranged under the slip ring fixing block, and a moving table is arranged, and an air passage is arranged in the moving table. The utility model has the advantages of simple structure, high precision and greatly improving the working efficiency.
