Claims

1. (2E)-But-2-enedioic acid - 3-(2-{[4-(trifluoromethoxy)phenyl]amino}-1-[(1R,5R)-3,3,5-trimethylcyclohexyl]-1H-benzimidazol-5-yl)propanoic acid (1:4).

2. Adduct according to Claim 1 in crystalline form, characterized by maxima in the X-ray diffractogram at the following 2 theta angles: 5.4, 6.8, 10.2, 10.3, 10.8, 11.1, 16.8, 21.6.

3. Adduct according to Claim 1 in crystalline form, characterized by maxima in the Raman spectrum at the following wavenumbers in units of cm^{-1}:
3088, 3047, 2934, 2910, 2874, 2771, 2717, 1658, 1632, 1615, 1521, 1463, 1451, 1420, 1338, 1306, 1294, 1277, 1245, 1198, 1184, 1167, 1155, 1127, 1109, 1077, 1049, 1018, 979, 961, 943, 922, 908, 877, 866, 839, 817, 789, 767, 714, 700, 685, 646, 631, 613, 568, 517, 503, 450, 438, 416, 388, 358, 339, 330, 102.

4. Method for preparing the adduct according to any of Claims 1, 2 or 3, comprising the steps of:

- introducing 3-(2-{[4-(trifluoromethoxy)phenyl]amino}-1-[(1R,5R)-3,3,5-trimethylcyclohexyl]-1H-benzimidazol-5-yl)propanoic acid and (2E)-but-2-enedioic acid in isopropanol, wherein for 1 mol of 3-(2-{[4-(trifluoromethoxy)phenyl]amino}-1-[(1R,5R)-3,3,5-trimethylcyclohexyl]-1H-benzimidazol-5-yl)propanoic acid, 0.3 to 0.8 mol of (2E)-but-2-enedioic acid are used,

- heating the mixture with stirring up to the boiling point to obtain a clear solution,

- crystallizing out of (2E)-but-2-enedioic acid - 3-(2-{[4-(trifluoromethoxy)phenyl]amino}-1-[(1R,5R)-3,3,5-trimethylcyclohexyl]-1H-benzimidazol-5-yl)propanoic acid (1:4), preferably by concentrating the solution.

5. Adduct according to any of Claims 1, 2 or 3 for use in the treatment and/or prophylaxis of diseases.

6. Medicament comprising the adduct according to any of Claims 1, 2 or 3.

7. Medicament according to Claim 6 comprising one or more further active ingredients.

8. Medicament according to either of Claims 6 or 7 comprising one or more inert, non-toxic, pharmaceutically acceptable auxiliaries.

9. Medicament according to any of Claims 6, 7 or 8 for use in the treatment of tumours.
