ABSTRACT

SYSTEM FOR COMMUNICATION BETWEEN MOBILE BODIES, MOBILE BODY TRANSMISSION CONTROL DEVICE, AND MOBILE BODY RECEIVING CONTROL DEVICE

A system for communication between mobile bodies includes: a mobile body transmission device that is used for a first mobile body and transmits first mobile information; and a mobile body reception device that is used for a second mobile body and receives the first mobile information. The mobile body transmission device includes: an indirect transmitter that transmits information via a base station; a direct transmitter that transmits information according to direct transmission; and a transmission controller that controls the indirect transmitter and the direct transmitter to transmit an identical first mobile information. The mobile body reception device includes: an indirect receiver that receives the first mobile information transmitted by the indirect transmitter via the base station; and a direct receiver that directly receives the first mobile information transmitted by the direct transmitter.
