emulsifier, lipophilic vehicle, buffering agent, tonicity agent, demulcent, preservative, plasticizer, occlusive agent, film former, and a combination thereof.

9. The composition of claim 1, further comprising an agent selected from the group consisting of an anti-inflammatory, antimicrobial, analgesic, anesthetic, lubricating agent, and a combination thereof.

10. The composition of claim 1, further comprising a solubility enhancing agent.

11. ~~A method for treating an ocular condition resulting from an androgen deficiency comprising administering an effective amount~~ Use of an ophthalmic composition comprising a physiologically effective amount of an androgen in the manufacture of a medicament for treating an ocular condition resulting from an androgen deficiency, wherein said ~~composition~~ medicament is suitable for topical administration to an eye, and wherein at least one symptom of the ocular condition is alleviated.

12. The ~~method~~ use of claim 11, wherein the ocular condition is blepharitis.

13. The ~~method~~ use of claim 11, wherein the androgen is selected from the group consisting of testosterone, dihydrotestosterone, dehydroepiandrosterone, androstenedione, androstenediol, androsterone, oxymetholone, and 17α-methyl-nortestosterone, methyltestosterone, 6-methyl-nortestosterone, and esters, analogues, and combinations thereof.

14. The ~~method~~ use of claim 11, wherein the ~~composition~~ medicament is selected from the group consisting of a solution, emulsion, suspension, gel, ointment, occlusive film, and a sustained release film.

15. The ~~method~~ use of claim 11, wherein the ~~carrier~~ medicament comprises an additional constituent selected from the group consisting of a thickener, neutralizing agent,

emulsifier, lipophilic vehicle, buffering agent, tonicity agent, demulcent, preservative, plasticizer, occlusive agent, film former, and a combination thereof.

16. The ~~method~~ use of claim 11, further comprising an agent selected from the group consisting of an anti-inflammatory, antibiotic, analgesic, anesthetic, lubricating agent, soothing agent, and a combination thereof.

17. The ~~method~~ use of claim 11, wherein symptoms associated with the ocular condition are prevented.

18. The ~~method~~ use of claim 11, wherein symptoms associated with the ocular condition are reduced.

19. The ~~method~~ use of claim 11, wherein symptoms associated with the ocular condition are eliminated.

20. The ~~method~~ use of claim 11, wherein the administration is to be repeated until one or more symptoms of the ocular condition are reduced.

21. The ~~method~~ use of claim 11, wherein the administration is to be repeated until one or more symptoms of the ocular condition are eliminated.

22. The ~~method~~ use of claim 11, wherein the ~~composition~~ medicament is to be administered to the eye, upper lid, lower lid, and a combination thereof.
