(54) Title: IMAGE PROCESSING METHOD AND APPARATUS, ELECTRONIC DEVICE, AND COMPUTER READABLE STORAGE MEDIUM

(54) 发明名称: 图像处理方法、装置、电子设备及计算机可读存储介质

图 1

S110 When a first image obtained comprises a human face, perform first transformation processing on the first image to obtain a second image
S120 Determine in the first image a target position of a second target human face key point of the human face in the second image on the basis of a first target human face key point of the human face in the first image
S130 Perform first movement processing on the second image according to the target position
S140 Generate a target image according to the first image and the second image subjected to the first movement processing, and display the target image

(57) Abstract: Embodiments of the present disclosure relate to the technical field of image processing. Disclosed are an image processing method and apparatus, an electronic device, and a computer readable storage medium. The image processing method comprises: when a first image obtained comprises a human face, performing first transformation processing on the first image to obtain a second image; determining in the first image a target position of a second target human face key point of the human face in the second image on the basis of a first target human face key point of the human face in the first image; performing first movement processing on the second image according to the target position; and generating a target image according to the first image and the second image subjected to the first movement processing, and displaying the target image. The method in the embodiments of the present disclosure can provide images having novel special effects for users, thereby meeting diversified user demands on image changes, and effectively improving user experience and user satisfaction.

本国际公布：

- 包括国际检索报告 (条约第21条(3))。

(57) 摘要：本公开实施例涉及图像处理技术领域，公开了一种图像处理方法、装置、电子设备及计算机可读存储介质，其中，图像处理方法包括：当获取到的第一图像包括人脸时，对第一图像进行第一变换处理，得到第二图像；基于第一图像中人脸的第一目标人脸关键点，确定第二图像中人脸的第二目标人脸关键点在第一图像中的目标位置；根据目标位置，对第二图像进行第一移动处理；根据第一图像与第一移动处理后的第二图像，生成目标图像，并显示目标图像。本公开实施例的方法，为用户提供样式新颖的特效图像，满足用户对图像变化的多样化需求，有效提升用户体验与用户满意度。
