Abstract

A pharmaceutical composition, wherein an anti-HER2 antibody-drug conjugate in which a drug-linker represented by the following formula (wherein A represents a connecting position to an anti-HER2 antibody) is conjugated to the anti-HER2 antibody via a thioether bond, and a HER dimerization inhibitor are administered in combination, and/or a method of treatment, wherein the anti-HER2 antibody-drug conjugate and a HER dimerization inhibitor are administrated in combination to a subject.
