

ABSTRACT

The present invention aims to provide a caffeine-containing beverage having reduced bitterness. The present
5 invention provides a caffeine-containing beverage containing caffeine and ethyl glycoside, wherein a weight ratio of ethyl glycoside to caffeine (ethyl glycoside/cafeine) is 0.05 to 50, a caffeine concentration is 80 to 1500 ppm, and an ethyl glycoside concentration is
10 50 to 20000 ppm.
