(54) Title: INSTRUMENT ADVANCEMENT DEVICE HAVING AN INDICATOR MARKING

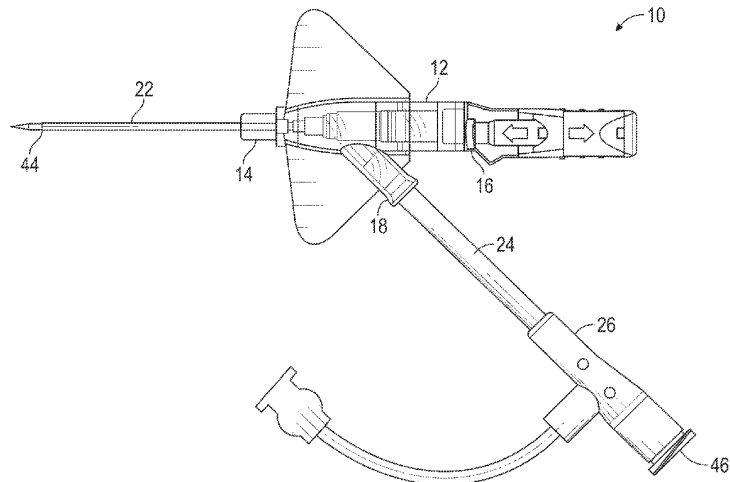

FIG. 1A

(57) Abstract: An instrument advancement device may include an instrument and an advancement feature configured to advance the instrument distally through the catheter assembly. The instrument advancement device may include a first indicator marking, a second indicator marking, and a third indicator marking. In response to aligning the advancement feature with the first indicator marking, a distal tip of the instrument may be configured to align with a distal tip of a catheter assembly. In response to aligning the advancement feature with the second indicator marking, the distal tip of the instrument may be advanced a distance distal to the distal tip of the catheter assembly. In response to aligning the advancement feature with the third indicator marking, the distal tip of the instrument may be advanced another distance distal to the distal tip of the catheter assembly.
