(54) **Title:** APPARATUS AND METHOD FOR WET TREATMENT OF DISC-LIKE ARTICLES

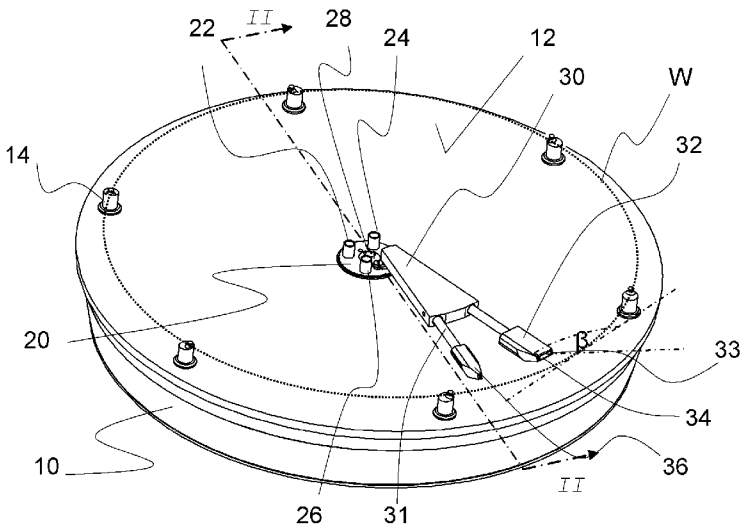

Fig. 1

(57) **Abstract:** Disclosed is an apparatus for wet treatment of a disc-like article, which comprises: a spin chuck for holding and rotating the disc-like article, and an inner edge nozzle dispensing treatment liquid directed towards a first peripheral region of the first surface of the disc-like article, wherein the first surface is facing the spin chuck and the first peripheral region is defined as being a region of the first surface with an inner radius (ri), which is greater than 1 cm less than the disc-like article's radius (ra), wherein the inner edge nozzle is positioned in a stationary manner between the disc-like article (when placed on the spin chuck) and the spin chuck, wherein the inner edge nozzle is feed through a central pipe, which is disposed in a stationary manner and penetrates centrally through the spin chuck, for supplying a treatment liquid against a first surface of the disc-like article.
