

WIRING BOARD AND MAGNETIC DISK APPARATUS

ABSTRACT

A through hole 2 is formed in an end portion of a wiring
5 board main body 1. A land 3 formed around the through hole 2
is in a shape having partially lacking portions symmetrically
formed on an end portion side of the wiring board main body 1
and on an opposite side of the end portion side. A component 5
is fixed to the land 3 by solder 4.
