

ABSTRACT

SUBSTITUTED PYRIDOTRIAZOLE COMPOUND, AND PREPARATION METHOD THEREFOR AND USE THEREOF

The present invention relates to the field of pharmaceutical technology, and specifically to substituted pyridotriazole compounds and the preparation method and use thereof. The present description discloses substituted pyridotriazole compounds having an inhibitory effect on RIPK1 and/or MLK, or a pharmaceutically acceptable salt, stereoisomer, solvate or prodrug thereof. The compound is represented by formula (I), wherein the definitions of respective groups in the formula are detailed in the description. In addition, the present invention further discloses a pharmaceutical composition comprising the compound, and use thereof in the preparation of a medicine for treating RIPK1-related diseases or disorders.
