

ABSTRACT OF THE DISCLOSURE (FIG. 1)

"METHOD AND APPARATUS FOR SERVO CONTROL USING
SPIRAL SERVO INFORMATION IN A DISK DRIVE"

5

In a disk drive using a disk medium storing
spiral servo information, a CPU generates virtual
servo information having assumed virtual track centers
corresponding to centers of concentric data tracks.

10

The CPU performs control to position a head to the
center of the concentric data track by using the
virtual servo information.
