(54) **Title:** USER INTERFACE TO ENHANCE MILLIMETER WAVE (mmWav) COMMUNICATIONS

FIG. 4

(57) **Abstract:** Wireless communications systems and methods related to providing user interfaces to inform a user of an antenna signal blockage at a wireless communication device are provided. A wireless communication device receives information associated with at least one antenna of the wireless communication device indicating that a signal path of the at least one antenna is at least partially blocked by an object. The wireless communication device outputs, via a user interface of the wireless communication device, an indication that the signal path of the at least one antenna is at least partially blocked.
