ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: DISPOSABLE DUST COLLECTORS FOR USE WITH CLEANING MACHINES

(57) Abstract: A dust collecting device is disclosed for use with cleaning equipment such as a vacuum cleaner. The device is a disposable dust ruffle made of an electret material. The ruffle prevents the equipment from spreading dust and itself acts as a dust magnet, both with respect to dust agitated by the machine and with respect to dust present in confined areas such as corners.
