

【Abstract】

The present invention relates to a pharmaceutical combination preparation comprising ezetimibe and losartan. When the pharmaceutical combination preparation is dissolved in a solution of pH 4.0 to 5.0 for 10 minutes, the dissolved amount of the losartan is 5,700 µg or less, and the dissolved amount of the ezetimibe is 270µg or more. The dissolution in a solution of pH 4.0 to 5.0 is carried out under the conditions of a temperature of 37 °C and a paddle method of 50 rpm in 500 mL of acetate buffer according to United States Pharmacopoeia for the pharmaceutical combination preparation comprising 20 mg of ezetimibe and 183 mg of losartan.
