

ABSTRACT

HAIR DRIER

To provide a hair drier capable of improving the scalp environment, a cover body (3) has an opening section (31) and
5 covers at least a portion of the head of the user in such a manner that the opening section (31) faces the head, and a facing surface (31a) facing the head is provided with a plurality of LED light-emitting sections (34) configured to emit LED light to the scalp of the head and is made of a highly
10 reflective member.
