(54) **Title:** ROUTE FOR VEHICLES AND METHOD OF BUILDING THE ROUTE

Fig. 3

(57) **Abstract:** Route for vehicles and method of building the route The invention relates to a route (19a) for vehicles driving on a surface of the route (19a), in particular for road automobiles, wherein: - the route (19a) comprises a plurality of shaped blocks (4) adapted to position and/or to hold a plurality of line sections of one or more electric lines (37a, 37b, 37c), - each shaped block comprises recesses (41, 42) forming spaces and/or projections delimiting spaces for receiving at least one of the line sections, - the electric line or lines (37a, 37b, 37c) extend(s) through the spaces, - the electric line or lines (37a, 37b, 37c) extend(s) along the surface of the route (19a) in and/or about the travelling direction of vehicles which are driving on the route (19a), - the shaped blocks (4) and the electric line or lines (37a, 37b, 37c) are supported by a base layer (31) of the route (19a), - the shaped blocks (4) and the electric line or lines (37a, 37b, 37c) are covered by a cover layer (35) of the route (19a), - the material of the cover layer (35) is also located in regions of the route sideways of the shaped blocks (4) so that the shaped blocks (4) and the cover layer (35) form an integrated layer on top of the base layer (31).
